DEXTER, CLARK F

ART UNIT

PAPER NUMBER

3724

DATE MAILED: 06/05/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.
09/533,685

Applicant(s)
Hearn

Examiner
Clark F. Dexter

Art Unit
3724

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Oct 9, 2001
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above, claim(s) 2, 10-14, 16, 17, and 19 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 3-9, 15, and 18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☒ The proposed drawing correction filed on Jun 29, 2001 is: a) ☒ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
*See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____ 6) ☐ Other: _____

Art Unit: 3724

DETAILED ACTION

1. The amendments filed June 29, 2001 and October 9, 2001 have been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Drawings

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on June 29, 2001 have been **approved**. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

Art Unit: 3724

Claim Rejections - 35 USC § 112

3. Claims 1, 3-9, 15 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, the recitation "the first cutting and nipping device nipping the web" is vague and indefinite since the invention is being positively defined in terms of the work piece which is not part of the claimed invention, and it is suggested to change "nipping" to --providing a nip for-- or the like; in lines 5-6, the recitation "the second cutting and nipping device nipping the web" is vague and indefinite since the invention is being positively defined in terms of the work piece which is not part of the claimed invention, and it is suggested to change "nipping" to --providing a nip for-- or the like.

In claim 4, line 2, "the nipping elements" lacks antecedent basis.

In claim 18, lines 5 and 6 are vague and indefinite as to what is being set forth, and it is suggested to delete "for" in line 5 and to reinsert --for-- in line 6 before "contacting".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3724

5. Claims 1, 3, 4, 9 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Boston et al., pn 5,740,709.

Regarding claims 1, 3, 4 and 9, Boston discloses an apparatus with every structural limitation of the claimed invention including a first cutting and nipping device (e.g., including 160, 162) and a second cutting and nipping device (e.g., including 164, 166).

Regarding claim 18, Boston discloses an apparatus with every structural limitation of the claimed invention including a cutting cylinder (e.g., 160; 164) and an anvil cylinder (e.g., 162; 166).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 5-8 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boston et al., pn 5,740,709 in view of Sturtz, pn 4,249,441 and Littleton, pn 5,103,703.

Boston discloses an apparatus with almost every structural limitation of the claimed invention but lacks (a) a urethane outer coating on the anvil cylinder and on the cutting cylinder;

Art Unit: 3724

- (b) a two-part metallic hub including a urethane layer bonded to the outer surface of the hub; and
- (c) the segmented cutting element bolted to the hub of the cutting cylinder.

Regarding (a), the Examiner takes Official notice that it is old and well known in the art to provide an outer coating of urethane on both cutting cylinders and anvil cylinders for various well known benefits including enhancing the friction characteristics of the outer surface of the cylinder; for example, Sturtz discloses one example wherein a urethane coating is provided as an outer layer of both an anvil cylinder and a cutting cylinder for enhancing the frictional forces of the particular roll, in this case between the roll and the work piece. Therefore, it would have been obvious to one having ordinary skill in the art to provide an outer coating of urethane on one or both of the cutting cylinders and anvil cylinders of Boston for various well known benefits including that described above.

Regarding (b), the Examiner takes Official notice that it is old and well known to provide a two-part metallic hub, and further to coat such a hub with urethane. In particular, the Examiner takes Official notice that it is old and well known in the art to form hubs in various configurations regarding number of parts thereof to facilitate assembly, maintenance or other well known design configurations. Further, for the reasons described above, it is old and well known in the art to provide an outer coating of urethane on cylinder hubs. Therefore, it would have been obvious to one having ordinary skill in the art to provide a two-part metallic hub, and further to coat such a hub with urethane for the well known benefits including those described above.

Art Unit: 3724

Regarding (c), the Examiner takes Official notice that it is old and well known in the art to bolt the segmented cutting element to the hub of the cutting cylinder. For example, Littleton discloses a cutting apparatus wherein the cutting knives are bolted to the hub. Such a configuration provides various well known benefits including simple removal and replacement of the cutting knives as well as inexpensive structure for reliably and releasably connecting the knives to the hub. Therefore, it would have been obvious to one having ordinary skill in the art to bolt the segmented cutting element to the hub of the cutting cylinder in the device of Boston for the well known benefits including those described above.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1148. The fax numbers for this group are: formal papers - (703)305-3579; informal/draft papers - (703)305-9835.

Clark F. Dexter
